# OPERATOR THEORY

Volume 4 1981

Editor: I. Gohberg

Birkhäuser

The Journal is devoted to the publication of current research in Integral equations. Operator theory and related topics with emphasis on the linear aspects of the theory. The Journal reports on the full scope of current developments from abstract theory to concrete applications and numerical methods.  
The Journal consists of two sections: a main section consisting of refereed papers and a second consisting of short announcements of important results, open problems, information, etc.
